
Contents

Chapter 1 Introduction

- 1.1 The Age of Digital Computing 1
- 1.2 The Incredible Digital Computer 3
- 1.3 Programming 9
- 1.4 Computer-System Components 11
- 1.5 Classes of Computer Systems 15
- 1.6 Networking 16
- 1.7 Security 18
- 1.8 So What is Computer Science? 18
- 1.9 History of Computing 21
- 1.10 Summary 26
- Exercises 27
- Bibliographical Notes 28

Chapter 2 The Art of Programming

- 2.1 Algorithms 29
- 2.2 Data 32
- 2.3 Prelude To Computer Programming 33
- 2.4 Basic Computer Programming 39
- 2.5 Instruction Set 43
- 2.6 Putting it All Together 45
- 2.7 Epilogue 46
- 2.8 Summary 50
- Exercises 51
- Bibliographical Notes 51

Chapter 3 Data Representation

- 3.1 The Nature of Data 53
- 3.2 Elementary Data Types 55
- 3.3 Non-elementary Data Types 59
- 3.4 Realtime Data Types 59
- 3.5 Meta Data 60
- 3.6 Files 61
- 3.7 View of Data 63
- 3.8 Other Issues 63
- 3.9 Data Analysis 63
- 3.10 Summary 64
- Exercises 64
- Bibliographical Notes 65

Chapter 4 Fundamental Data Structures

- | | | | |
|-------------|----|-----------------------|----|
| 4.1 Arrays | 68 | 4.7 Indexing | 81 |
| 4.2 Records | 69 | 4.8 Hashing | 83 |
| 4.3 Lists | 71 | 4.9 Summary | 85 |
| 4.4 Trees | 74 | Exercises | 85 |
| 4.5 Graphs | 79 | Bibliographical Notes | 86 |
| 4.6 Sets | 80 | | |

Chapter 5 Fundamental Algorithms

- | | | | |
|----------------------------------|----|-----------------------|-----|
| 5.1 Classification of Algorithms | 87 | 5.5 Summary | 105 |
| 5.2 Searching | 92 | Exercises | 105 |
| 5.3 Tree Traversal Algorithms | 93 | Bibliographical Notes | 105 |
| 5.4 Sorting | 97 | | |

Chapter 6 Approximation

- | | | | |
|------------------------------|-----|----------------------------|-----|
| 6.1 Heuristic Computation | 107 | 6.6 Time-accuracy Tradeoff | 125 |
| 6.2 Dynamic Programming | 111 | 6.7 Summary | 125 |
| 6.3 Decision Theory | 112 | Exercises | 125 |
| 6.4 Shortest Path Algorithms | 115 | Bibliographical Notes | 125 |
| 6.5 Histograms | 121 | | |

Chapter 7 Programming Concepts and Design Patterns

- | | | | |
|------------------------|-----|-----------------------|-----|
| 7.1 Divide and Conquer | 128 | 7.5 Summary | 156 |
| 7.2 Module Coupling | 135 | Exercises | 156 |
| 7.3 Repetition | 136 | Bibliographical Notes | 157 |
| 7.4 Design Patterns | 140 | | |

Chapter 8 Programming Language Notations

- | | | | |
|-------------------------------|-----|-----------------------|-----|
| 8.1 Procedural Languages | 161 | 8.5 Spreadsheets | 174 |
| 8.2 Object-Oriented Languages | 164 | 8.6 History | 177 |
| 8.3 Declarative Languages | 171 | Bibliographical Notes | 178 |
| 8.4 Regular Expressions | 173 | | |

Chapter 9 The von-Neumann Computer

- | | | | |
|-------------------------|-----|-------------------------|-----|
| 9.1 A Computer Model | 179 | 9.6 Computer Components | 194 |
| 9.2 Binary Signals | 180 | 9.7 Summary | 200 |
| 9.3 Binary Operations | 183 | Exercises | 200 |
| 9.4 Binary Circuits | 186 | Bibliographical Notes | 200 |
| 9.5 Arithmetic Circuits | 189 | | |

Chapter 10 State-of-the-Art Computer Architecture

10.1 Overview and Classification of Computer Architectures	202	10.5 SSD Memory Technology	202
10.2 RISC and CISC	202	10.6 CD-ROM and DVD	202
10.3 Pipelining and Parallelization	202	10.7 Summary	202
10.4 Millipede Storage Technology	202	Exercises	202
		Bibliographical Notes	202

Chapter 11 Digital Representation of Information

11.1 Binary coding	203	11.6 Data Compression	213
11.2 Coding of characters	205	11.7 Summary	216
11.3 Coding of numbers	205	Exercises	216
11.4 Coding of images	209	Bibliographical Notes	216
11.5 Coding of audio and video signals	211		

Chapter 12 Computer-System Organization

12.1 General System Structure	217	12.6 Networking	217
12.2 Interrupts	217	12.7 Summary	217
12.3 Storage Structure	217	Exercises	217
12.4 Caching	217	Bibliographical Notes	218
12.5 I/O Structure	217		

Chapter 13 Models of Sequential Computation

13.1 Turing Machines	219	13.5 Testing	226
13.2 Decidability	222	13.6 Summary	227
13.3 Finite State Machines	223	Exercises	228
13.4 Verification	225	Bibliographical Notes	228

Chapter 14 Models of Concurrent Computation

14.1 Motivation	230	14.6 Transaction Concept	230
14.2 Process Concept	230	14.7 Concurrent Transactions	230
14.3 The Critical-Section Problem	230	14.8 Summary	230
14.4 Semaphores	230	Exercises	230
14.5 Classic Problems of Synchronization	230	Bibliographical Notes	230

Chapter 15 Models of Distributed Computation

15.1 Motivation	232	15.6 Atomicity	232
15.2 Network Structure	232	15.7 Reaching Agreement	232
15.3 Communication Protocols	232	15.8 Summary	232
15.4 Robustness	232	Exercises	232
15.5 Mutual Exclusion	232	Bibliographical Notes	232

Chapter 16 Security

- 16.1 The Security Problem 234
- 16.2 Program Threats 234
- 16.3 System and Network Threats 234
- 16.4 Cryptography as a Security Tool 234
- 16.5 User Authentication 234
- 16.6 Implementing Security Defenses 234
- 16.7 Firewalls 234
- 16.8 Summary 234
- Exercises 234
- Bibliographical Notes 234

Chapter 17 Social Aspects of Computing

- 17.1 Privacy Issues 236
- 17.2 Data Mining 236
- 17.3 Ubiquitous Computing 236
- 17.4 Social Risks of Information Society 236
- 17.5 Ethics of Computing 236
- 17.6 Art and Computing 236
- 17.7 Myths on Information and Knowledge 236
- 17.8 Artificial Intelligence and Artificial Life 236
- 17.9 What is Difficult, What is Computable? 236
- 17.10 Summary 236
- Exercises 236
- Bibliographical Notes 236

Bibliography 855
